**CUTTING SYSTEMS, INC.**

CUTTING SYSTEMS, INC.

Hypertherm's nesting and process optimization software, computer numerical controllers (CNCs), torch height controls (THCs), and plasma systems all work together seamlessly to get the most out of your cutting operation. It is like having your best operator equipped with the latest technology – optimizing cut quality, productivity, and operating cost every day!

Attend Cutting Systems's Integrated Cutting Solutions Symposia and see how Integrated Plasma Cutting delivers:

- Embedded process expertise so you can quickly train new operators and maintain consistent performance from operator to operator, shift-to-shift and site-to-site
- A dramatic improvement in hole quality that outperforms anything previously possible with plasma
- An up to 100% increase in the number of parts produced per hour through Rapid Part™ technology
- Longer consumable life with no operator adjustment
- Virtual troubleshooting and diagnostic support via Remote Help™
